PERSONAL PROFILE

Creative	<p>My grade 6 teacher complained to my father that "he spends too much drawing and should focus more on his homework"</p> <p>The following year, I won the grade 7 art award for my contribution to the school. My work was showcased in the hallways, auditorium and the yearbook.</p> <p>Recently, at a grade 6 reunion, I took the class picture, blew it up on a colour photocopier, and on a large Bristol board, cut everyone's head, drew a body on each, and created a humourous scene from the classroom. Everyone signed it and gave it to our teacher as a retirement gift.</p>
Humanitarian	<p>Helping others comes naturally and makes me happy. I carry out random acts of kindness.</p>
Environmentalist	<p>I take plastic bottles out of the garbage my family throws out and put them in the recycling bin. The earth is the only home we have. We cannot be homeless.</p>
Team player	<p>I tell people at work that "We all wear the same jersey on this team. Would you score on your own goalie?"</p>
Nature-lover	<p>To walk in a natural, undisturbed environment, near an ocean with a warm breeze during a time when the sun is on the horizon, is one of the things that empowers my soul.</p>
World traveller	<p>The world is beautiful. Travel is knowledge. Natural and man-made wonders, learning about the culture and history of a country is the best education you can obtain outside a classroom.</p>
Philosopher	<p>We are all connected. We are all interdependent on each other and with nature. We are parts of the living and dynamic Earth machine. Our life journey should focus on finding what is our function and then seek to make our contribution.</p>
